[1] A classification system including about 800 individual occupations is used to cover all workers in the civilian economy. See appendix B for more information.
[2] Mean weekly earnings are the straight-time weekly wages or salaries paid to employees.
[3] The relative standard error (RSE) is the standard error expressed as a percent of the estimate. It can be used to calculate a "confidence interval" around a sample estimate. For more information about RSEs, see appendix A.

[4] Mean annual earnings are the straight-time annual wages or salaries paid to employees.

NOTE: Dashes indicate that data did not meet publication criteria. Overall occupational groups may include data for categories not shown separately.
